

How do I enter 1.8×10^5 (well I do get that) then I don't get on my calculator where the "change sign +\(-)" so that my display should show 1.8^{-05} ? Then I don't get how to enter \log_{10} and the change sign again?

To obtain 1.8^{-05}

Press 1.8 first then follow by

and then follow by

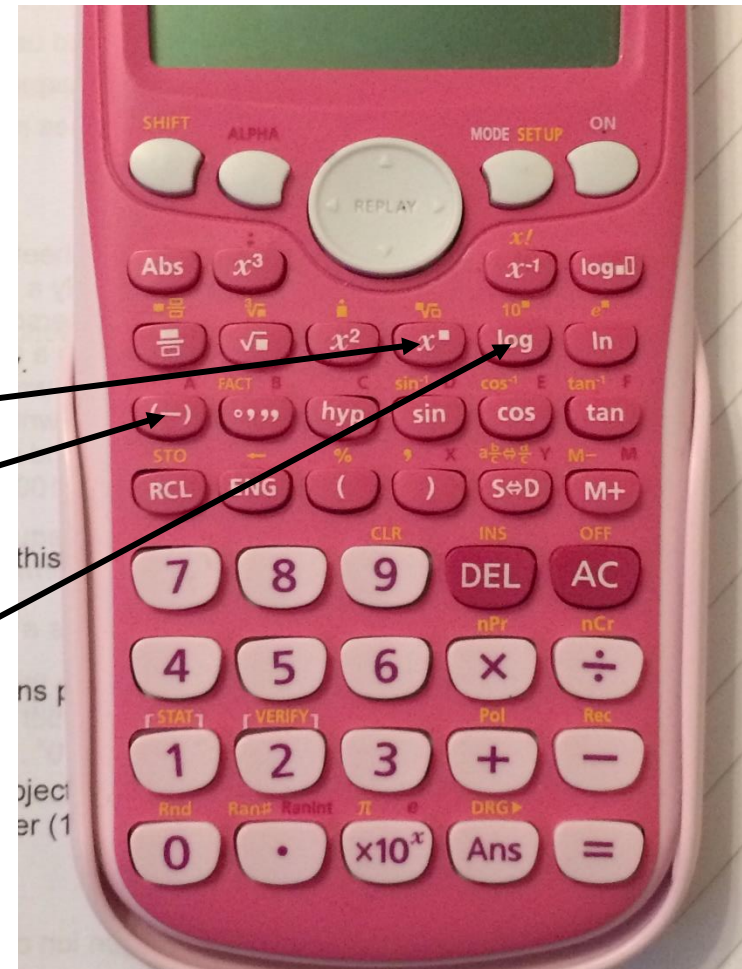

and then follow by 5.

If you want $\log_{10} 6$, just press

and then follow by 6.

If you want $\log_6 15$, press

and follow by pressing 6.

Use the navigating button to move to the bigger box and press 15.
