January 2012

International GCSE Chemistry (4CH0)  
Paper 2C

## **Edexcel and BTEC Qualifications**

Edexcel and BTEC qualifications come from Pearson, the world's leading learning company. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information, please call our GCE line on 0844 576 0025, our GCSE team on 0844 576 0027, or visit our qualifications website at [www.edexcel.com](http://www.edexcel.com). For information about our BTEC qualifications, please call 0844 576 0026, or visit our website at [www.btec.co.uk](http://www.btec.co.uk).

If you have any subject specific questions about this specification that require the help of a subject specialist, you may find our Ask The Expert email service helpful.

Ask The Expert can be accessed online at the following link:

<http://www.edexcel.com/Aboutus/contact-us/>

Alternatively, you can speak directly to a subject specialist at Pearson about Edexcel qualifications on our dedicated Science telephone line: 0844 576 0037

## **Pearson: helping people progress, everywhere**

Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for raising achievement through innovation in education. Find out more about how we can help you and your students at: [www.pearson.com/uk](http://www.pearson.com/uk)

| (iii)           | E                            |        |              | 1        |
| (iv)            | C                            |        |              | 1        |
| (b) (i)         | Atomic number                |        |              | 1        |
| (ii)            | Electrons in the outer shell |        |              | 1        |
|                 |                              |        | <b>Total</b> | <b>6</b> |

| Question number | Answer  | Accept  | Reject                            | Marks |
|-----------------|---|---|-----------------------------------|-------|
| 3 (a)           | (i) any named soluble metal sulfate / ammonium sulfate / (dilute) sulfuric acid   | correct formula   | <u>concentrated</u> sulfuric acid | 1     |
|                 | (ii) correct formulae for all compounds (mark consequentially on the sulfate given in (a)(i), even if insoluble, except lead(II) sulfate)   | $\text{Pb}^{2+} + \text{SO}_4^{2-} \rightarrow \text{PbSO}_4$ for 2 marks |                                   | 1     |
|                 | balanced  |   |                                   | 1     |
|                 | (iii) filter  |   |                                   | 1     |
|                 | wash / rinse (with distilled / deionised water)   |   |                                   | 1     |
|                 | If no reference to what is being washed, assume that the residue is being washed<br><br>filter paper / kitchen roll / blotting paper / absorbent paper / leave (to dry) / (pace in) desiccator / (place in warm) oven / heat<br><br>If no filtration MAX 1.<br>If implication that filtrate is washed or evaporated , neither M2 nor M3 can be awarded<br>Do not penalise careless use of solution or liquid for reaction mixture |   |                                   | 1     |

| Question number | Expected Answer   | Accept                                  | Reject              | Marks    |
|-----------------|---|---|---------------------|----------|
| 3 (b)           | Any two from<br>bubbles (of gas) / fizzing / effervescence<br>Ignore carbon dioxide<br>solid / lead(II) carbonate disappears<br>solution formed / colourless liquid<br>Ignore incorrect starting colours<br>Ignore heat produced and temperature change | gas given off<br>dissolves / less solid | any specific colour | 2        |
|                 |   |   | <b>Total</b>        | <b>8</b> |

| Question number | Answer   | Accept  | Reject       | Marks    |
|-----------------|--|---|--------------|----------|
| 4 (a)           | (i) to allow air / oxygen to enter (the crucible) / to come into contact with the magnesium / solid<br>Ignore references to visual checks of reaction completion   | to allow the magnesium to burn / react  |              | 1        |
|                 | (ii) to make sure that <u>all</u> of the magnesium has reacted   | to make sure that the (all) magnesium has reacted<br><br>to complete the reaction |              | 1        |
| (b)             | mass of crucible (and lid) + MgO — mass of crucible (and lid)<br><br>lids must be in both or neither<br><br>ignore any references to the table of results on page 8  | mass of crucible (and lid) at end — mass of crucible (and lid)                    |              | 1        |
| (c)             | (i) all points plotted correctly to nearest gridline (subtract 1 mark for each error)<br><br><u>correct</u> straight line of best fit (need not pass through origin)<br>(must be drawn with the aid of a rule) | line as evidence of correct plotting when points cannot be seen                   |              | 2        |
|                 | (ii) anomalous point at (0.26, 0.64) circled   |   |              | 1        |
|                 | (iii) csq on candidate's graph<br>Units not needed, ignore incorrect units   |   |              | 1        |
|                 |  |   | <b>Total</b> | <b>8</b> |

| Question number | Answer   | Accept                                  | Reject                           | Marks |
|-----------------|--|---|----------------------------------|-------|
| 5 (a)(i)        | (damp / moist) litmus paper<br>bleaches / turns white  | decolourised / loses its colour         |                                  | 1     |
|                 | <b>OR</b><br>(damp / moist) starch-iodide paper<br>turns blue / black<br>(allow observation mark only for starch-iodine paper) |   |                                  | 1     |
| (ii)            | <b>OR</b><br>(bubble through) (potassium) iodide solution<br>(solution ) turns brown<br>(ignore the starting colour)           | orange / orange-brown / red-brown       | yellow / red                     | 1     |
|                 | hydrogen   | $H_2 / H^2 / H2 / h_2 / h^2 / h2$       | H / 2H / h / 2h                  |       |
| (b)             | (solution is) alkali(ne) / hydroxide ions<br>(present) / $OH^-$<br><br>ignore references to sodium ions                        | sodium hydroxide / NaOH<br>(is present) | any other named ion or substance | 1     |

| Question number | Answer   | Accept                | Reject       | Marks    |
|-----------------|--|-----------------------|--------------|----------|
| 5 (c) (i)       | (10 / 2) = 5   |                       |              | 1        |
|                 | (ii) (5 x 24)<br>= 120 dm <sup>3</sup> (units required)<br>mark part (ii) consequentially on part (i)<br>award second mark only for use of 22.4<br>Final answer must be to 2 or more sig fig | 12000 cm <sup>3</sup> |              | 1<br>1   |
|                 |  |                       | <b>Total</b> | <b>7</b> |

| Question number | Answer  | Accept   | Reject   | Marks      |
|-----------------|---|--|--|------------|
| 6 (a)           | Cu(OH) <sub>2</sub><br>penalise incorrect use of cases and subscript<br>ignore names  | Formula showing correct charges on the ions  |  | 1          |
| (b)             | to remove carbonate (ions) / to avoid precipitating any other (named) insoluble (barium) compounds / to remove ions that would form (white) precipitates  | to remove compounds that would form (white) precipitates   |  | 1          |
| (c)             | CuSO <sub>4</sub> .5H <sub>2</sub> O / CuSO <sub>4</sub> 5H <sub>2</sub> O (i.e. no dot)  | formula showing correct charges on the ions  |  | 1          |
| (d)             | (use a clean) wire / glass rod / silica rod<br><br>ignore references to hydrochloric acid<br><br>(to put) solid in <u>non-luminous / Bunsen</u> flame<br><br>No marks if solid is in container eg test tube / tray / crucible | any method of introducing the solid / solution into the flame. e.g. (wet) wooden spill / tip or sprinkle in<br><br>Bunsen/non-luminous anywhere in answer<br>Burner in place of flame<br>Blue for non-luminous | copper rod / any metal that will burn or melt in a flame (eg magnesium, aluminium) | 1<br><br>1 |
|                 |   |  | <b>Total</b>   | <b>5</b>   |

| Question number | Answer   | Accept  | Reject   | Marks |
|-----------------|--|---|--|-------|
| 7 (a)           | it /gasoline is used (as a fuel) for cars<br><br>ignore references to uses of fuel oil and gasoline burning better   | there are more cars than ships  | Any other wrong use, eg domestic heating, aeroplanes, ships, etc | 1     |
| (b) (i)         | C <sub>4</sub> H <sub>8</sub>  | 2C <sub>2</sub> H <sub>4</sub>  |  | 1     |
| (ii)            | Catalyst - silica / silicon dioxide / silicon(IV) oxide / alumina / aluminium oxide<br><br>Temperature - 600 - 700(°C)<br><br>If more than catalyst given, all must be correct | zeolite(s) / aluminosilicates<br><br>Any temperature or any range within 600-700(°C)<br>Equivalent temperatures in Kelvin |  | 1     |

| Question number | Answer   | Accept | Reject            | Marks    |
|-----------------|--|--------|-------------------|----------|
| 7 (c) (i)       | Cracking – any two from: <ul style="list-style-type: none"> <li>• continuous process</li> <li>• pure(r) product</li> <li>• fast(er) process</li> <li>• takes place on large(r) scale</li> <li>• high(er) percentage yield</li> <li>• 100% atom economy</li> </ul> ignore references to cost  |        |                   | 2        |
| (ii)            | Fermentation – any two from: <ul style="list-style-type: none"> <li>• sugar is a renewable resource / uses a renewable resource</li> <li>• country has suitable climate/ enough land to grow sugar cane / plentiful supply of sugar (cane)</li> <li>• country has no / little crude oil</li> <li>• (ethanol produced) suitable for making alcoholic drinks / vinegar</li> <li>• takes place at lower temperature / uses less energy</li> </ul> ignore references to cost |        | reusable resource | 2        |
|                 |  |        | <b>Total</b>      | <b>8</b> |

| Question number | Answer   | Accept                            | Reject       | Marks    |
|-----------------|--|-----------------------------------|--------------|----------|
| 8 (a)           | (15.0 ÷ 1000) × 0.0010   |                                   |              | 1        |
|                 | = 1.5(0) × 10 <sup>-5</sup>  | 1.5 × 10 <sup>-2</sup> for 1 mark |              | 1        |
| (b)             | answer to (a)  |                                   |              | 1        |
| (c)             | $\frac{\text{answer to (b)} \times 1000}{25.0}$  |                                   |              | 1        |
|                 | correct evaluation (= 0.0006(0))   | answer to (b) ÷ 25 for 1 mark     |              | 1        |
| (d)             | $M_r$ of SO <sub>2</sub> = 64  |                                   |              | 1        |
|                 | answer to (c) × $M_r$ of SO <sub>2</sub> (= 0.038(4))<br>Final answer must be to 2 or more sig fig |                                   |              | 1        |
| (e)             | The wine is drinkable<br>Ignore any explanations   | consequential on (d)              |              | 1        |
|                 |  |                                   | <b>Total</b> | <b>8</b> |
