2014 Preliminary Mean Scores

For the 2014 test, UKCAT has rescaled some subtests. This means that mean average scores in 2014 are likely to be different from those observed in 2013. This **preliminary** information is provided for the information of candidates.

Please note: data is only valid up to the 8th August when only 2300 candidates had taken the test. Candidates should only use these figures as a rough guide to judge their own performance. Averages will change as the testing cycle continues and these figures will be updated to reflect this.

The mean average score (up to 8th August 2014) is 2536.

The following table gives the decile ranges of candidates who have taken the test up to 8th August 2014

Decile	Total Score
1st	2170
2nd	2330
3rd	2420
4th	2490
5th	2550
6th	2610
7th	2680
8th	2760
9th	2860
10 th	2860+

As stated above this is preliminary data only and is subject to change. Data will be updated towards the beginning of September.
